

Please do not weaken the state of Wisconsin's "no call list". I put myself and my parents on it as soon as it came out and it has been very beneficial to all of us. We don't need to be disturbed during the dinner hour (or at any other time) by telemarketers. These telemarketers are clearly an invasion of our privacy and the Wisconsin law has been a very effective tool against these invasions. Banks don't need to call me, they already send me enough federally subsidized third class junk mail. Thank you!
